Project Proposal Form
B. Tech. CSE 4 th Sem Project (Batch 2023-27)

Details of Student:
(IN BLOCK LETTERS)

S.N0	Names	Enrollment No.	CGPA
1	Yash Singhal	231b405	7.99
2	Yash Singh	231b404	8.03

Broad Title of project

Area/ Concept involved: Weather app

Language / Tools that may be used: android, java, android-application, android-studio, java-application, java-android-application.

Brief Description about project: We developed a user-friendly Android application that delivers real-time weather updates using data from a reliable weather API. The app features current weather conditions, hourly and weekly forecasts, temperature, humidity, and wind speed for any selected location. With GPS-based location detection and a clean, intuitive UI, our app ensures users stay informed about the weather wherever they go.

Expected Outcomes at the end of the Sem: By the end of the semester, we aim to gain hands-on experience in Android development using Java, improve UI design skills, enhance teamwork, and build a fully functional quiz application.
